Journal of CONSUMER BEHAVIOUR
An International Research Review

SPECIAL ISSUE

Guest Editors:
George Spais, Hellenic Open University, Greece, spais.georgios@ac.eap.gr
Ian Phau, Curtin University, Australia, Ian.Phau@cbs.curtin.edu.au
Varsha Jain, MICA, India, varsha.jain@micamail.in

Submission Window: November 30, 2022 to January 5, 2023

AI Marketing and AI-Based Promotions Impact on Consumer Behavior and the Avoidance of Consumer Autonomy Threat

Artificial intelligence (AI) is gaining traction in a variety of fields as a way to cut costs, boost revenue, and improve customer happiness (Johnson et al., 2022). Many organizations - and the marketing teams that support them - employ creative technology solutions fast to improve operational efficiency while simultaneously increasing customer happiness. Long-term cooperation that helps increase customer happiness is an unanticipated advantage of encouraging AI innovation to assist digital marketing. Artificial intelligence (AI) is likely to change customer interactions in digital marketing. (Rabby., Chimhundu & Hassan, 2021). Machines may translate data into tactics that influence meaningful customer behavior. AI is commonly referred to as human intelligence processes by machines (Haenlein & Kaplan 2019).

When organizations use digital marketing to influence consumer behavior, they are more likely to have higher customer satisfaction (Ransbotham et al., 2017). By using these platforms, marketers can acquire a more sophisticated and comprehensive picture of their target audiences. Artificial intelligence (AI)-enabled digital marketing makes it even easier for businesses to reach out to the appropriate customers at the right time. (Ransbotham et al., 2017). The data gathered throughout this procedure can then be used to boost conversions while also lowering marketing teams' workload. Artificial intelligence (AI) marketing makes automated decisions based on data gathering, analysis, and additional observations of audience or economic patterns that may influence marketing efforts. When speed is crucial, AI is commonly used in marketing campaigns. AI systems understand how to effectively communicate with customers based on data and customer profiles, then send them targeted messages at the appropriate time without the involvement of a marketing team, assuring maximum productivity.

Many marketers are looking for artificial intelligence (AI) to help their teams complete more tactical activities that do not require human experience. Chatbots managed by artificial intelligence are proving to be advantageous to enterprises. Stores that use AI-powered marketing outperform traditional retailers by a factor of five. Because of digital marketing, customer behavior has shifted considerably, with current consumers demanding a more consistent and personalized experience. According to Salesforce, only 29% of marketing executives employed AI in 2018, but that percentage is expected to rise to 84% by 2020. According to IDC, by the end of 2021, global

investment in artificial intelligence hardware, software, and services will have surpassed $340 billion. On the other side, clients are eager to spend more time educating themselves before purchasing due to AI innovation in digital marketing (Singh et al., 2019). Further, designing Marketing AI systems that customers will not hate privacy concerns get most of the attention from tech skeptics, but powerful predictive algorithms can generate serious resistance by threatening consumer autonomy (e.g., Carmon et al., 2019)

Based on the above, the following are some of the themes of interest. However, they are not exhaustive:

- AI Marketing; Understanding the needs and preferences of the consumer
- AI Marketing, AI-Based Promotions and the threat of consumer autonomy
- AI Marketing predictions the purchasing behavior of their target customer
- AI Marketing and customer engagement
- AI Marketing and customer well being
- Consumer trust due to AI innovation in digital marketing
- Consumer familiarity with AI in digital marketing and purchase process
- Marketing automation technology, AI and promotions, and influence on consumer behavior
- Channel and time optimization: Delivering messages through the suitable medium at the right time to the right customer
- Ensuring accurate data matching when combining internal and external consumer informationTypologies of customers (or potential customers) that benefit most from AI Marketing and consumers who will be adversely impacted
- AI transformation of the luxury industry – consumer behavior of luxury digital platforms of both fashion and hospitality services.

Submission Criteria
• The submissions need to specify how their research contributes to consumer behaviour theory and practice.

Submission
All manuscripts submitted must not have been published, accepted for publication, or be currently under consideration elsewhere. Manuscripts should be submitted in accordance with the JCB author guidelines online at
https://onlinelibrary.wiley.com/page/journal/14791838/homepage/forauthors.html
All submissions should be made via the online submission system
https://submission.wiley.com/journal/cb and should be made to the special issue, which is identified on the submission site.

Submission Deadline: January 5th, 2023

About the Guest Editors
Dr. George Spais is an Adjunct Faculty Member of the Hellenic Open University. He has held adjunct faculty posts at University of Nicosia (Cyprus), Canterbury Christ Church University, UK (Athens Campus), London Metropolitan University, UK (Athens Campus), Kentucky University, USA (Athens Campus), New Haven University, USA (Athens Campus), Athens University of Economics and Business (Greece), Agricultural University of Athens (Greece), University of Ioannina (Greece), University of Patras (Greece), University of Thessaly (Greece), Hellenic Open University (Greece), and at other Greek Universities. His areas of his expertise are promotion

management, cooperative advertising, sponsorships and marketing education. His research works have appeared in international, refereed and indexed journals (including Thunderbird International Business Review, European Journal of International Management, Journal of Strategic Marketing, Journal of Promotion Management and Marketing Education Review), conference's proceedings (including conferences of the Academy of Marketing Science and the American Marketing Association) and book chapters. Dr. Spais is an Editorial Advisory Board Member of Asia Pacific Journal of Marketing and Logistics (Emerald Publishing, UK), FIIB Business Review/FBR (Sage Publications, USA), and Journal of Business Case Studies (Clute Institute, USA). He serves as associate editor of the Journal of Promotion Management and he edited special issues of journal publications and book volumes as guest editor. He is a member on the editorial boards of (in alphabetical order) Asian Journal of Marketing, Innovative Marketing, International Journal of Consumers Studies, International Journal of Integrated Marketing Communications, International Review of Management, Journal for Advancement of Marketing Education, Journal of Emerging Trends in Marketing and Management, Journal of Global Scholars of Marketing Science, Journal of Marketing Analytics, Journal of Marketing Education, and Marketing Education Review. He is also acting as regular reviewer for several leading international refereed marketing and business journals and academic conferences organized by academies, associations and societies such as AMS, EMAC, EURAM, BAM, ANZMAC, AM, GAMMA, AMA, SMA and IIMA.

Professor Ian Phau is the Marketing Discipline Lead and the Director of the Luxury Branding Research Cluster. He continues to maintain a high calibre profile in a wide range of industry sectors, where his extensive industry and research expertise have led to much success. Recent portfolios include LVMH, Shiseido, Prada, Gucci, Millbrook Winery, Larry Jewelry and DPIRD. Within these collaborations, his research has focused on country image, luxury branding, brand counterfeiting and piracy, consumer animosity and advertising appeals. His publications appear in the Journal of Business Research, Journal of Advertising, Journal of Advertising Research, European Journal of Marketing, Journal of Retailing and Consumer Services, Journal of Brand Management and Psychology and Marketing, amongst others. He is the current Editor-in-Chief for the Asia Pacific Journal of Marketing and Logistics (Emerald). This has subsequently led to him being awarded the Emerald Literati Network Awards for Excellence – Leading Editor Awards for outstanding editorship for Asia Pacific Journal of Marketing & Logistics in 2007. Further, he has been heavily involved in the supervision for Honours, Masters and PhD dissertations across several research areas and has had many successful students.

Professor Varsha Jain is a professor of marketing and co-chairperson, doctoral program, and research at the MICA, India. She is an associate editor at, journal of consumer behavior, an editorial board member at the journal of advertising research and journal of business research. She has worked as the co-editor, special issue for branding and gamification, journal of promotion management, UK. She has also co-edited the book related to higher education which would be out in print by March 2022, McMillan, UK. She is also co-editing other books associated with AI and services and AI and marketing, Mc Millan, UK. She has authored over 100+ publications, including multiple papers in A* and A journals such as the European Journal of Marketing, Journal of Product and Brand Management, Journal of Business Research, Journal of Advertising Research, International Journal of Information Management, and so on. Prof. Jain is the recipient of more than 22 national and international awards and gold medals in scholarship. The recent award includes “First MICA AGK Annual Award for Excellence in Research 2020-2021” and JCB Reviewer of the Year Award 2020”, Journal of Consumer Behavior, USA. In her research career, she is visiting guest at Emory Business School, Atlanta, USA, visiting scholar at Greenwich University, London, and The Medill School, North-western University, USA. She is co-authoring books related to qualitative research in the digital age, Sage, UK, customer relationship management in the digital context, and consumer behavior in the digital world (international edition). Her core areas are consumer behavior, branding, advertising, and digital marketing.
